Expanding horizons

We believe that mutual connections and exchange of ideas enable new perspectives, creating even more tangible opportunities for growth and improvement. And this is how we view the union between Previbayer and Prevmon.

The synergy between the two entities has expanded our horizons, revealing the good practices and experiences obtained by each of them and strengthening their commitment to developing high-quality, solid and transparent management, focused on a single goal: to continue helping our more than 10,000 participants and retired build a better financial future.

We expect the two entities to be fully integrated by the end of 2021, but until then we will be leading the first steps of this new organization, which is larger, stronger and more prepared for the challenges of the future.

We continue moving forward. Together we are stronger and can go further!
